

Distribuciones

Hasta ahora

Exploración del dataset

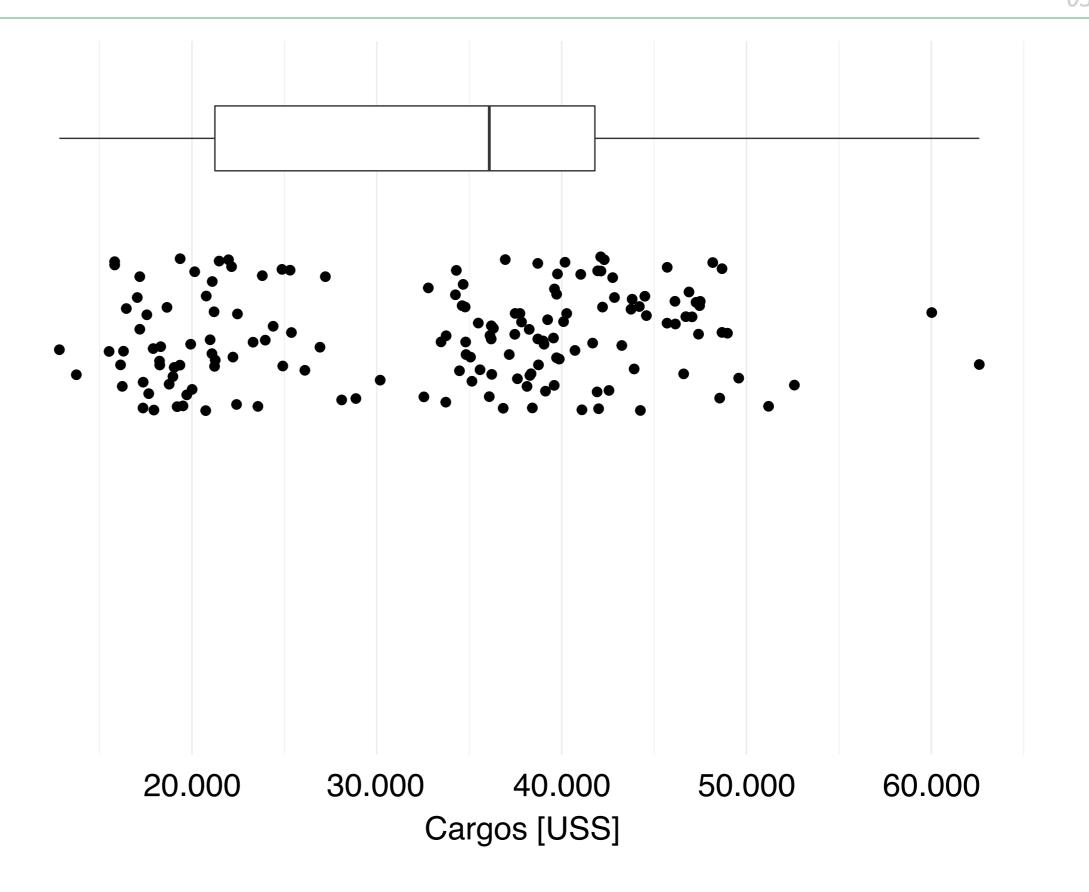

Manipulación (orden, filtrado, agrupamiento)

Métricas de resumen + graficarlas (boxplot)

insurance

costo seguro médico hombres, fumadores

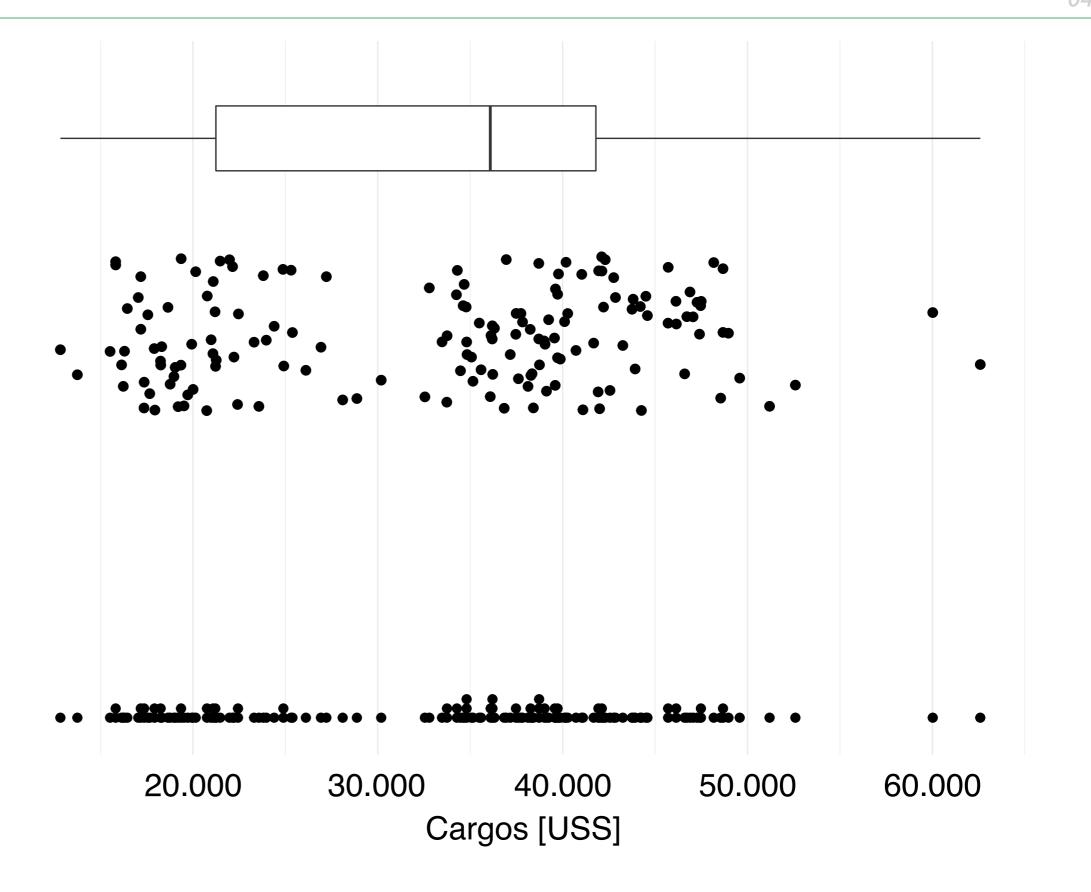

geom_boxplot() +
geom_jitter()

insurance

costo seguro médico hombres, fumadores

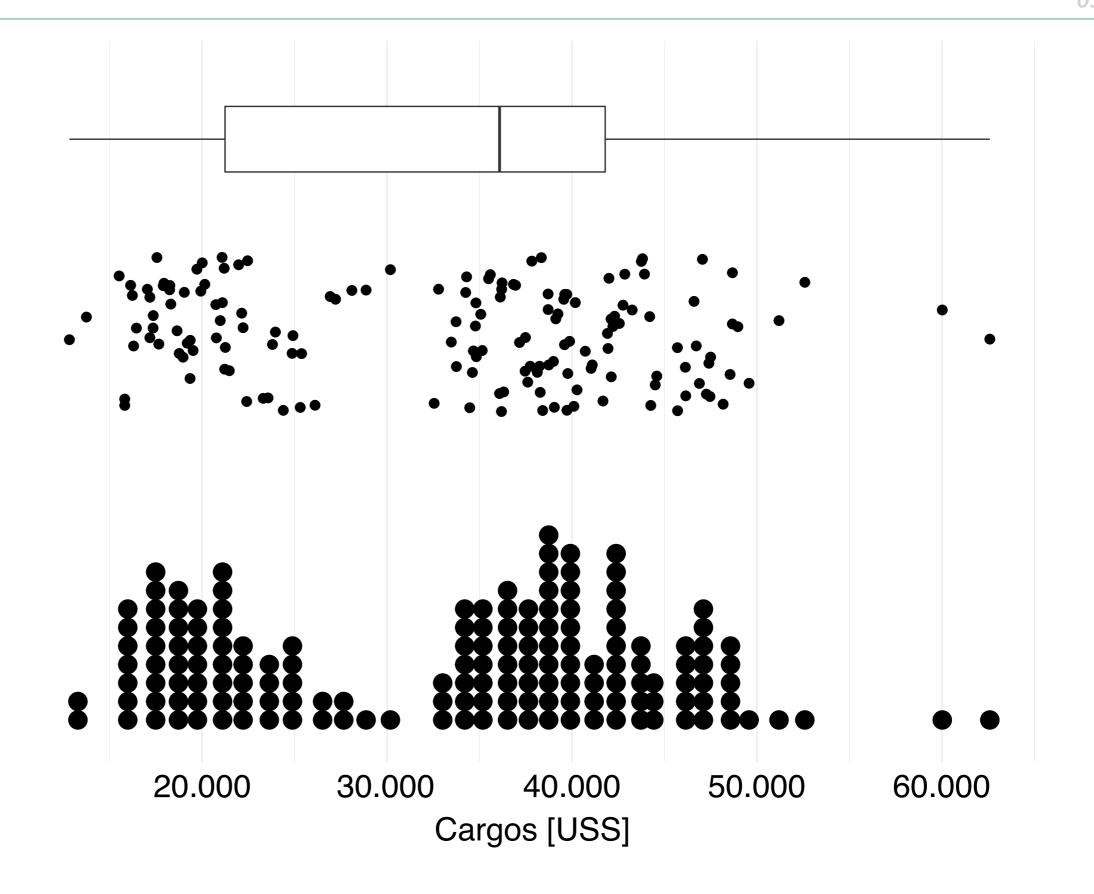

```
geom_boxplot() +
geom_jitter() +
geom_dotplot()
```

insurance

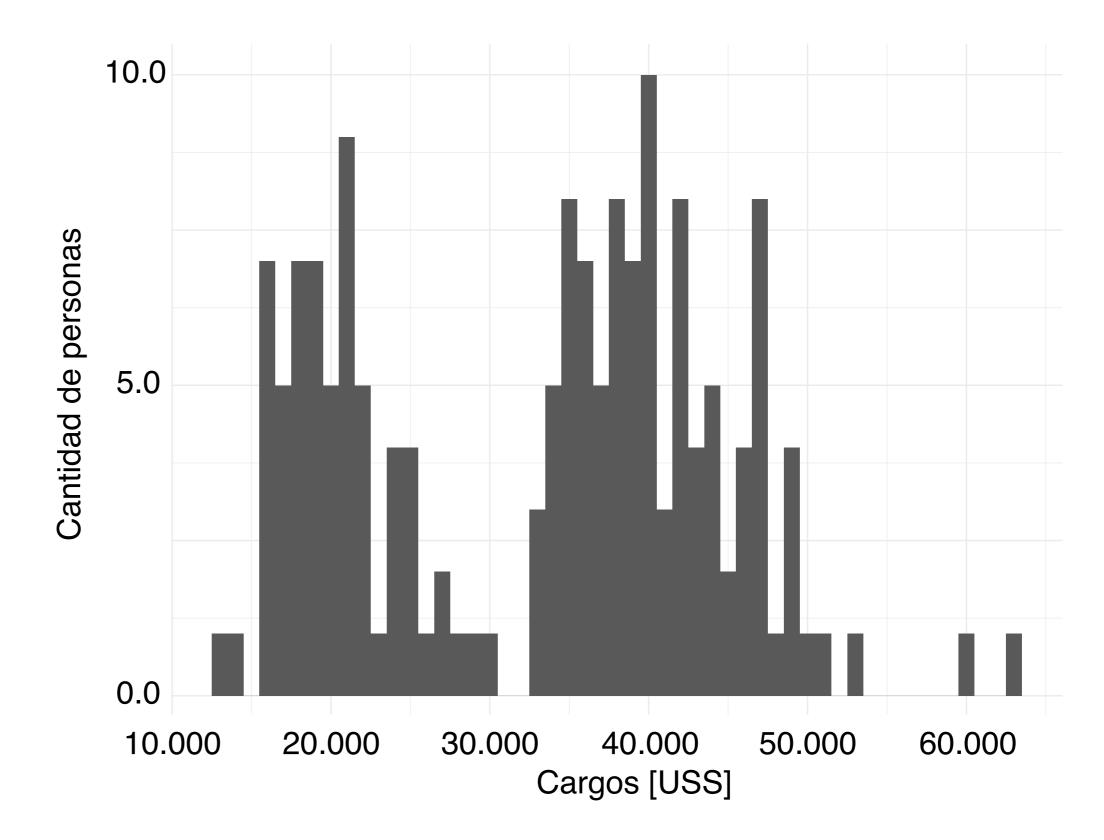

costo seguro médico hombres, fumadores

```
geom_boxplot() +
geom_jitter() +
geom_dotplot()
```

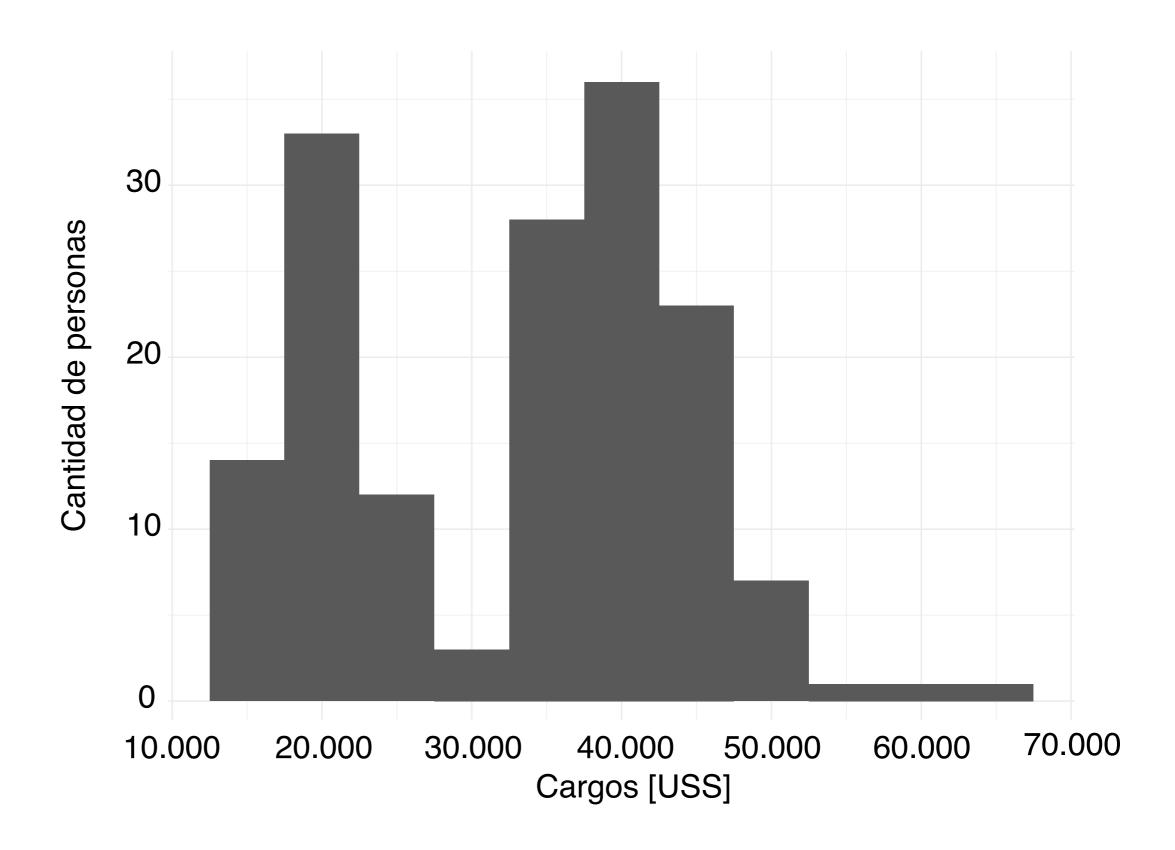

histograma

geom_histogram(
binwidth = 1000)

histograma

geom_histogram(
binwidth = 5000)

comparar distintos tamaños de conjuntos

geom_histogram(
fill= smoker)

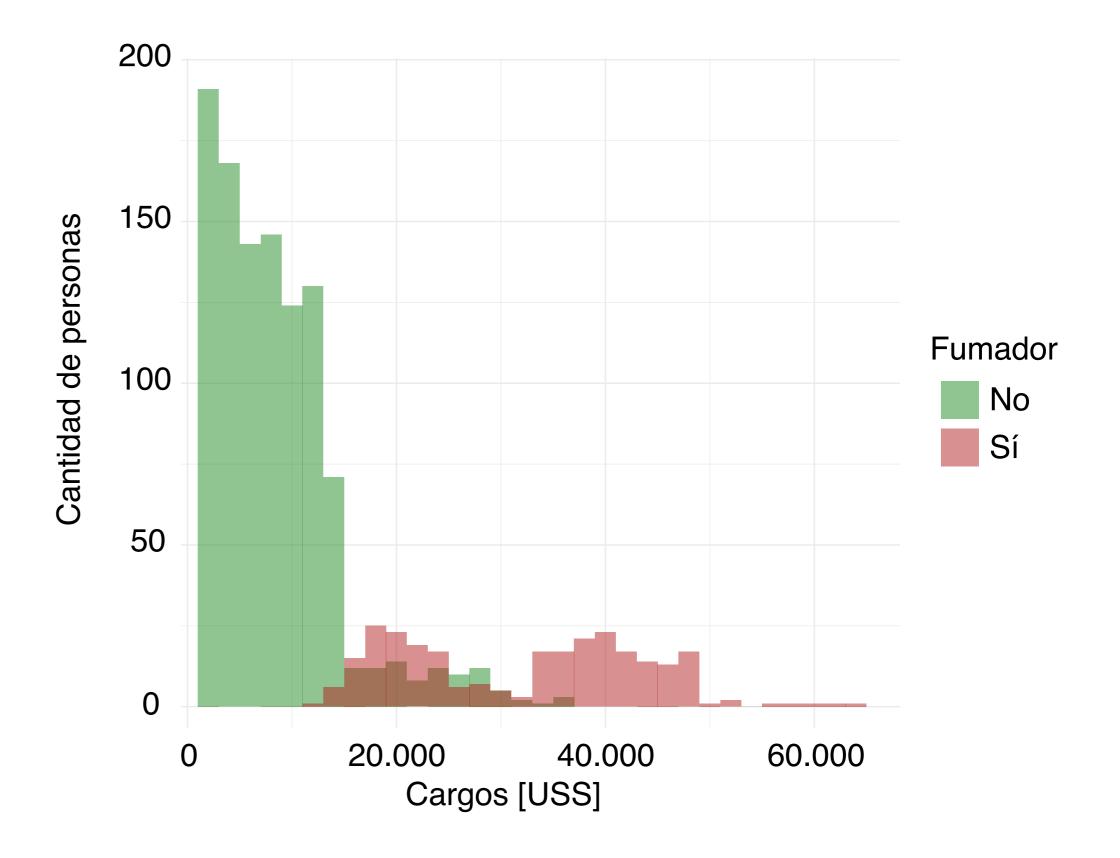

gráfico de densidad

geom_histogram(
fill= smoker,
y = ..density..)

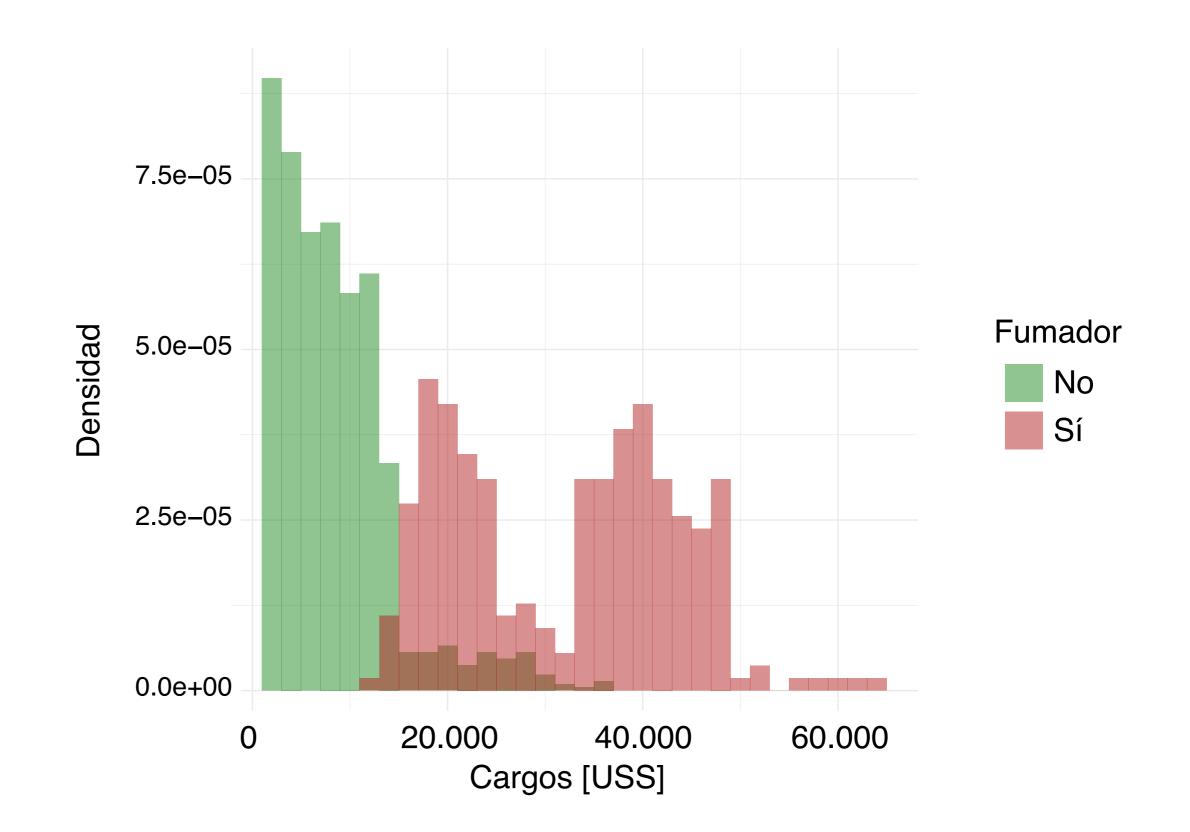

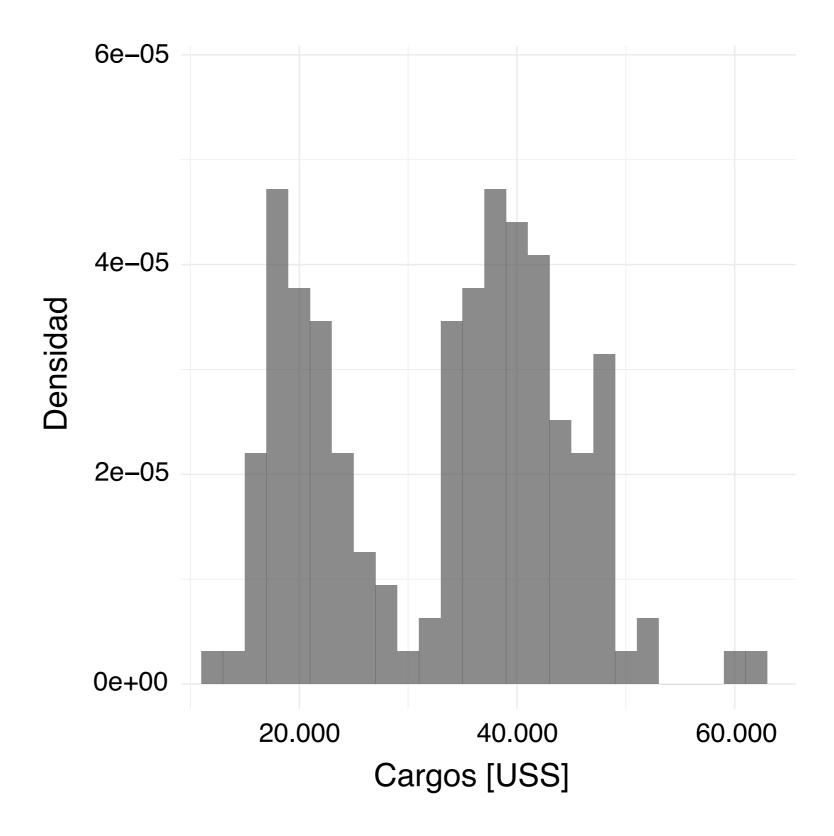

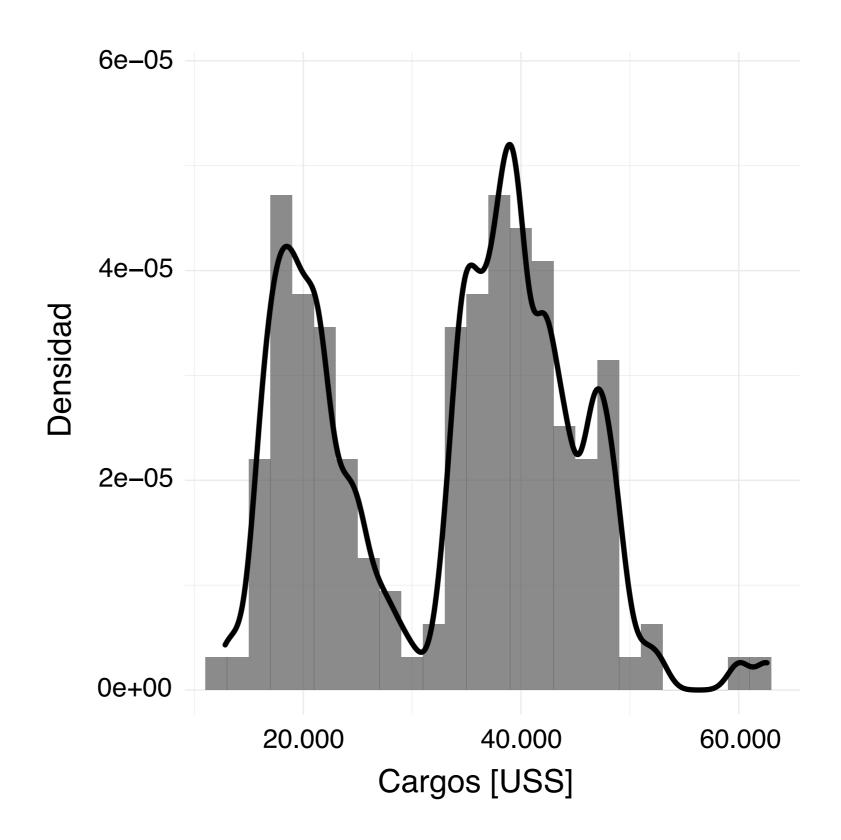

gráfico de densidad

geom_histogram(
y = ..density..)

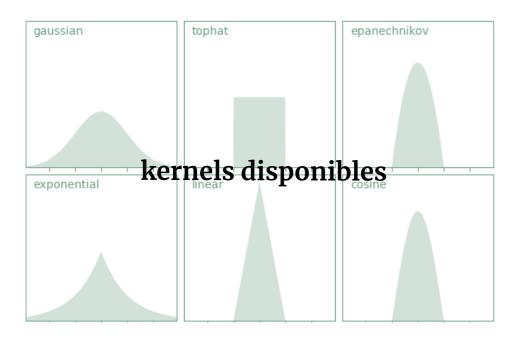

estimación de densidad con kernel

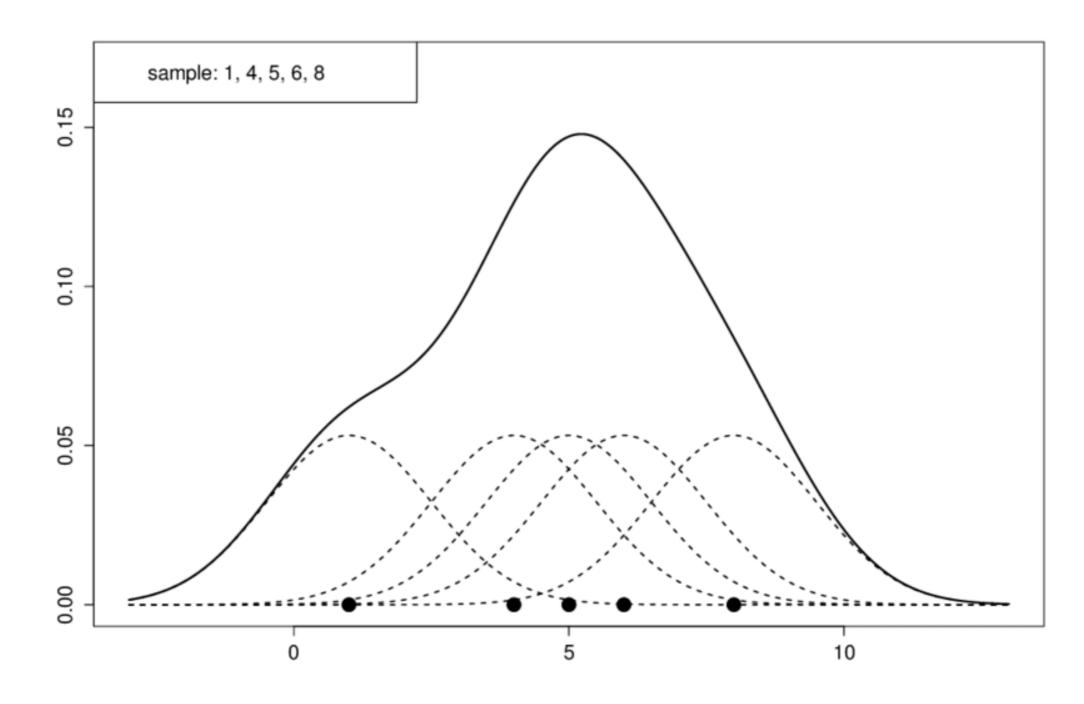

```
geom_histogram(
y = ..density..) +
geom_density()
```

estimación de densidad con kernel

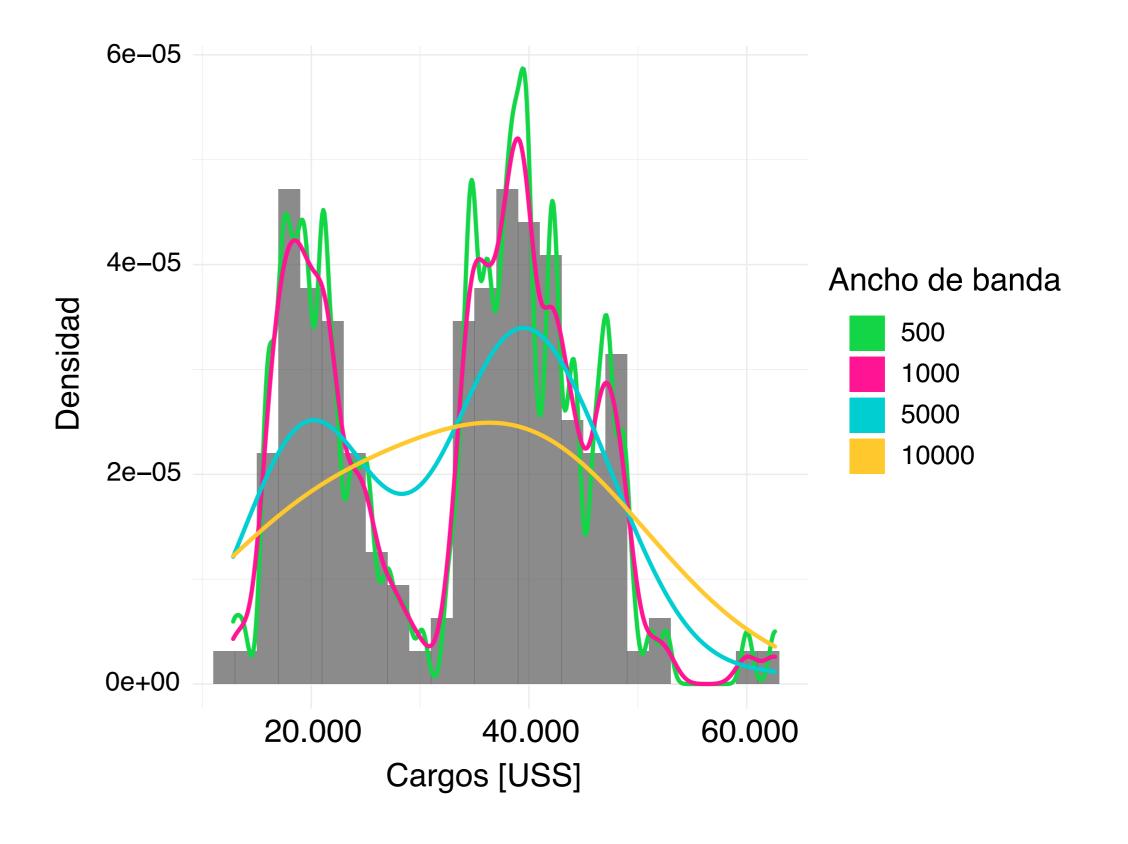

kernel gaussiano

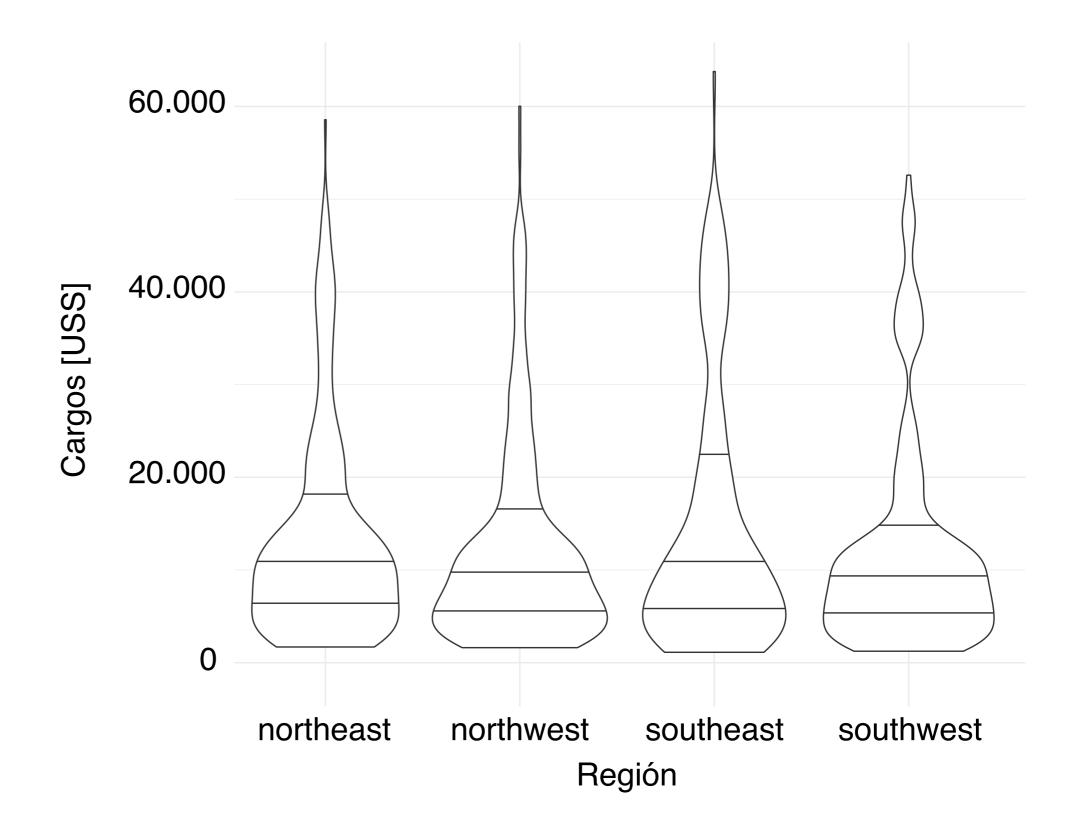

ancho de banda (bandwidth)

```
geom_histogram(
bw = ....)
```

violinplot

geom_violin(
draw_quantiles=....)

Caractetísticas de estas nuevas representaciones

Visión más completa de la distribución

Menos compacta que las métricas de resumen
